Congress associated to

WHAT TO EXPECT AT THE ASF 2022 CONGRESS?

Exchange state of the art research in Marine and Continental Sedimentology, Geomorphology, Archaeology, Tectonics, Environment and impacts, etc.

- 400 scientists from both academia or industry
- 3 days of state of the art research presentations
- Keynote speakers each day of sessions
- Pre- and post-meeting excursions in Brittany
- Conference dinner
- “Students meet industry” activities
- Networking opportunities throughout the event!

Come
and
meet

- Universities and labs purchasing managers
- Lecturers and researchers (University of Brest, University of Rouen Normandie, University of Savoie Mont Blanc, etc)
- Research institutes and associations (IFREMER, BRGM, French Geological Society, etc)
- Students
- And maybe your future collaborators

WHAT DOES A BOOTH INCLUDE?

6 sq. m. stand* including:

- An area enclosed panels, a table and chairs and a sign
- A rail of 3 spotlights, an electric connection and free WiFi
- Cleaning

* Also included:

- 2 tickets to access the conference, participate in B2B meetings and lunches from 28th to 30th Sept. 2022 for 2 people
- 6 invitations to the exhibitor's drink reception for me and my leads
- **The logo and description** of my organisation on the ASF and Sea Tech Week® websites and in the programmes of the ASF 2022 congress and Sea Tech Week® given to each participant

Route de Brest
29820 Guillevic
France

HOW MUCH DOES A BOOTH COST?

€1,500 EXCL. TAX

€1,000 excl. tax

(ASF Committee members)

EXHIBITOR'S DRINK RECEPTION

Network with the other exhibitors

Invite your current and upcoming clients or partners

Distribute your 6 invitations as you want

- Tuesday 27th September 2022, early evening
- Within the exhibition space
- By invitation only
- Additional invitations: € 17 (excl. tax)

THE SHOWROOM

A DEDICATED SPACE FOR YOUR DISPLAY

- Indoor and outdoor
- Showroom only: € 1 500 (excl. tax)
- Extra cost for exhibitors: € 300 (excl. tax)

The FRENCH SEDIMENTOLOGIST ASSOCIATION (Association des Sédimentologiste Français) was created in 1965 to reunite people interested in the study of sediments, sedimentary rocks and all geological processes in relation to sedimentation.

- The association is open to teaching and research staff, students, and the general audience
- It has over 450 members in France and French speaking countries
- The ASF organises field trips, specialized workshops, field schools and training for students, teachers and scientists as well as publications
- Since 1987, it organises national meetings gathering over 400 scientists every two years

The new born Geo-Ocean laboratory is a Unité Mixte de Recherche from Université de Brest (UBO), CNRS, IFREMER and Université de Bretagne Sud (UBS) gathering together about 200 researchers, students and technical staff. It also has close partnerships

with the French hydrographic office (Shom), France Energie Marine and SEDISOR.

- Our core specialities are Geosciences and our main application domain is Ocean;
- Geo-Ocean is hosted within the Observatoire des Sciences de l'Univers (OSU) of Institut Universitaire Européen de la Mer (IUEM) and Ifremer in Plouzané, France;
- Our research interests are multi-scales and multi-approaches including, among others, mechanical coupling chemical transfers, transfers between solid Earth and superficial envelopes, coastal risks or sedimentological archives.

Geo-Ocean is proud, in the frame of United Nations Decade of Ocean Sciences for Sustainable Development, to organise and host in Brest the 18th national congress of Association des Sédimentologues Français (ASF)

EXHIBITION PLAN

ASF 2022 Congress is a joint event of SEA TECH WEEK® (Sept. 27-30, 2022)

SEA TECH WEEK® is a week-long international event focusing on marine science and technology. It brings together every two years in Brest, France, about 1000 leading international experts in various marine-related disciplines. The event provides opportunities for scientists, businesses, clusters, students, etc. to share advances in research and innovation, develop business contacts, and strengthen partnerships and collaborations. Main theme 2022: maritime transport
Featured country: India
